DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-16, drawn to methods of isolating a (1,3) (1,4) beta glucan from milled cereal grain.

Group II, claim(s) 17-27, drawn to compositions comprising (1,3) (1,4) beta glucan.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: PCT Rule 13.2 defines "special technical features" as "those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art." Group I claims methods of isolating (1,3) (1,4) beta-glucan with a particle size less than 0.2 μm . Group II claims compositions comprising (1,3) (1,4) beta-glucan with a particle size less than 0.2 μm . The unifying technical feature of the inventions of Groups I and II is a (1,3) (1,4) beta-glucan with a particle size less than 0.2 μm . Potter et al. (US Pub. No. US2002/0016454 A1, publication date Feb. 2, 2002) disclose an

aqueous solution comprising up to about 100% (1,3) (1,4) beta-glucan (page 2, paragraph 23). Since the (1,3) (1,4) beta-glucan is aqueous, the particle size in solution would be less than 0.2 μm . Therefore the unifying technical feature of the claimed inventions makes no contribution over the prior art, consequently there is no special technical feature uniting all of claimed inventions.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
